Call 518-572-6427 or Stop In Today to Register for Numerology 101!

Pythagoras: Father of Numerology

Pythagoras was one of the first and most well-known Greek mathematical thinkers. Born around 570 BC, he spent most of his life in the Greek colonies and southern Italy. There are a number of reports that he traveled to Babylonia, Phoenicia and Egypt where he formed the basic principals of numerology. He believed there was power in numbers and felt there are recognizable patterns that identify talents and characteristics of a person based on your birth date and name given at birth.

Pythagoras is most remembered for the Pythagorean theorem.
